

ABOUT US

We are what our products define us more than what we call ourselves...

Hexacarb started with an objective to solve corrosion problems seen in various process elements. Graphite as an Anti-Corrosive piece of equipment is driving force of the business.

We are a renowned name in the field Graphite Heat & Mass Transfer Equipment. We are a group of engineers bring expertise from various steams spanning an overall experience of more than 50 years.

HEXACARB ENGINEERS PVT LTD

Experts in Corrosion-Resistant Solutions

Our vision

We believe in robust, rigid & reliable piece of equipment. Hexacarb vision is to make long serving equipment that guarantees efficiency and economy of its customers.

Our mission

Hexacarb Engineers Pvt Ltd is committed to design & manufacture graphite equipment for Pharma, Chemical, Oil & Gas industry adhering to stringent quality standards & traceability of material.

Our Products

We design manufacture and commission all your graphite process equipment needs. We offer extensive range of graphite heat & mass transfer solutions for your most corrosive applications. We are truly recognized by our products & services.

All our solutions engineered by in-house team with in-depth expertise and latest design software.

Our products are manufactured in acc to various design standards maintaining top Quality standards.

Our products stand for better performance, lesser downtime and lead ROI.

All our products are recognized for quality and reliability by top corporations.

Product portfolio:

- Graphite HE - Series HCL (Cylindrical Block Type)
- Graphite HE - Series HCB (Cubical Block Type)
- Graphite Condenser (Polyblock)
- Graphite Condenser (Shell & Tube)
- Thermosyphon Reboiler
- Falling Film Absorber - FFA
- Falling Film Evaporator - FFE
- Graphite Columns
- Scrubbers
- Graphite Cooler (Multi-pass option)
- Sulfuric Acid Concentration / Dilution Systems
- HCL Recovery & Dry Acid Generation Systems
- Rupture Disc -Series RD , Thermowell , Burners

Our Priority is Quality
